

## **Len Van Staalduinen, Google SketchUp for the Small Design Firm**

Participants in this seminar will learn how to:

- ⇒ Integrate SketchUp into the design process.
- ⇒ Use SketchUp as a tool to explore technical solutions.
- ⇒ Implement SketchUp into your practice.

Len recommends to bring a laptop with the Google SketchUp application loaded to receive hands on instruction that will enable designers to reap the benefits of using SketchUp on their next project.

Len Van Staalduinen, AIBD of Greenville, NC splits his time between duties as the Department Chair of the Architectural Technology program at Pitt Community College, and his custom residential design firm Design Plus. His education includes an Associate of Applied Science in Architectural Drafting Technology from Pitt Community College and a Bachelor of Environmental Design in Architecture from N.C. State University.

Len's focus is on creating custom residential designs based on traditional design concepts. His designs incorporate energy and resource efficient features into structures that meet the needs of client's individual lifestyles.
